TapRooT® VI Toggles

Basic Investigation or Major Investigation

Are you conducting a **MAJOR** investigation or a **BASIC** investigation? The type selected determines which fields are required for the investigation.

TapRooT® VI Toggles

Question View or Tree View

The new **Question View** allows you to navigate the Root Cause Tree® by answering questions with yes/no answers rather than clicking on specific images on the screen. Each question aids you in determining the exact root cause of your causal factor.

TapRooT® VI Toggles

Question View or Tree View

The familiar **Tree View** allows you to navigate the Root Cause Tree® by selecting the various Root Cause categories instead of answering multiple questions to determine the root cause of the causal factor. If you are unsure if you should select the category you can select the **?** icon to look at detailed questions that help you determine if you should select Yes or No to the category.

TapRooT® VI Toggles

Simple OR SMARTER Corrective Action

Do you require completing a SMARTER Corrective Action or is a Simple Corrective action sufficient? The **Simple** Corrective Action only looks for the corrective action and who completes the action is unimportant.

TapRooT® VI Toggles

Simple OR SMARTER Corrective Action

Do you require completing a SMARTER Corrective Action or is a Simple Corrective action sufficient? The **SMARTER** Corrective Action not only identifies the corrective action, but assigns individuals to implement the specific corrective action, verify the implementation, and validate the corrective action resolves the issue.
