

TapRooT® VI Updates (6.5.0)

Divisions Sharing

- Ability for managers to see data across all divisions

Lessons Learned

- Ability to share lessons learned from investigations with your peers

Trending

- Process behavior charts now available for trending
- Determine whether a “process” should be examined for quality-related problems

Corrective Action Display

- Easier to create and design fixes

API (Application Programming Interface)

- Ability to access SnapCharT® & Investigation page links from API/ TapRooT® partner sites
- “Callback” data for real time synchronization with API/TapRooT® partner sites

Equifactor®

- Failure modes & Failure Agents guidance added to the equipment troubleshooting tool
- Easy step-by-step guidance to determine possible failures in a design
